Форма 1en_ИИАСА. Данные о проекте на английском языке

Данные, приведенные в следующих пунктах, будут использоваться при проведении совместного заседания по обсуждению результатов экспертизы

1.1. **Project Name**

1.2. **Name, Family Name Russian Project coordinator**

1.3. **Name, Family Name IIASA Project coordinator**

1.4. **Key words** *(no more than 15 words)*

1.5. **Annotation of the project** *(briefly; including relevance, scientific novelty of the study; methodology, expected results and their significance, significance of international cooperation)*

1.6. **State of the art and preliminary work**

Please explain briefly and precise the state of the art in your field in its direct relationship to your project. This description should make clear in which context you situate your own research and in what areas you intend to make unique, innovative, promising contribution. This description must be concise and understandable without referring to additional literature

1.7. **Project-related publications**

Please list project partners most significant publications that relate directly to the proposed project and document your preliminary work. This list should contain no more than 10 publications.

1.8. **Objectives**

Please give a concise description of your project's research programme and scientific objectives. Please indicate if you anticipate results that may be relevant to fields other than science (such as science policy, technology, the economy or society).

1.9. **Work programme including proposed research methods**

Please give a detailed account of the steps planed during the proposed funding period including a description of the contributions to be made by the project partners from both countries. For experimental projects, a schedule detailing all planned experiments should be provided. Please provide a detailed description of the methods that you plan to use in the project: What methods are already available? What methods need to be developed? What assistance is needed from outside your own group/institute.

1.10. **Data handling**

Improving the management and handling of research data is a priority both for national and international research organizations and for science in general. If research data or information will be systematically produced in the project, describe if and how these will be made available for future reuse by other researchers. Please regard existing standards and data repositories or archives in your discipline where appropriate.

1.11. **Added value of international cooperation**

The cooperation among the partners involved and the expected added value of the planned cooperation should be described in detail.

1.12. **Additional information**
